## Installation Instructions for AirGizmos Gust Locks

Revision 3, September 2019

Thank you for purchasing an AirGizmos Gust Lock.

Please follow the steps below to secure it properly in place.

### Step 1: Position the Gust Lock

Make sure that both parts of the wing are aligned flat and slide on the Gust Lock to cover the split between two surfaces.

The Gust lock shown here is rotated with the long surface to be perpendicular to the latch which is the desired position for fabric surfaces” You can rotate the latch mechanism to the position that works best for your application.

### Step 2: Tighten the Strap

Holding Gust Lock firmly in place, tighten the strap.

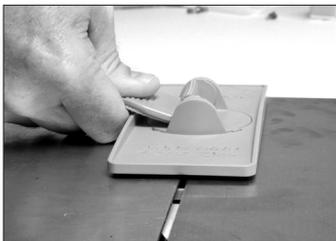

### Step 3: Hold the Strap and Tab

After the strap has been tightened, lift it up and hold **together** with the tab.

It is important to keep tension on the strap.

### Step 4: Lock the Gust Lock

Firmly holding the strap and the tab, lower them in the direction of the strap to lock the Gust Lock.

### Step 5: Use the Strap Holders

Feed the strap through the strap holders to reduce movement in the wind.

A link to an instructional video is available on the AirGizmos Website, [www.airgizmos.com](http://www.airgizmos.com)

Congratulations! Your installation is complete. Please email us with any questions you might have at [info@airgizmos.com](mailto:info@airgizmos.com).
